As a self-motivated, hardworking student in computer engineering, I seek a software internship that will teach me the technologies commonly used in the field, whilst utilizing my analytical and design skills.

## Experience

### Software Engineer Intern

**Borda Technology**, Istanbul

Jun 2020 - Present

Borda Technology brings smart IoT solutions for healthcare industry. I really appreciate being in the Borda team since they have great corporate dynamics that values every idea. In the Borda Academy we learn technologies such as Flutter, React.js, Docker, C#, ASP.NET Core, etc. Next month, as interns, we will be developing a project to deliver a safe and a smart environment for COVID-19 office life.

### Undergraduate Teaching Assistant

**Koc University**, Istanbul

Jun 2020 - Present

I am a teaching assistant for the course UNIV199 - Introduction to Programming with Python. I help students with their problems in weekly sessions and also grade homeworks and exams.

### Web Development Intern

**DAL Engineering Group**, Istanbul

Aug 2019 - Sep 2019

I worked on the development of a website for a startup using my HTML, CSS, Javascript and React.js skills while following the Scrum software development methodologies.

## Hobbies / Interests

Co-founder and coordinator of a clothing brand named "CHAKSY" since 2017. Working at management, design, production, marketing and sales.

Music Production (FL Studio)

Developing apps, programs, websites with recent technologies.

Cooking

## Languages

Turkish (Native)

English (Professional Working Proficiency)

## Education

### Koc University

**Department of Computer Engineering**, Istanbul

2017- 2022

Current GPA: 3.10/4.00

Current Academic Level: Junior

Active member: Koc University IEEE

Active member: DJ of KURadyo

## Projects

### KuGPA

A web app for students in our college to easily calculate their SPA and GPA by adding/ removing courses. We've used React.js and Flask frameworks. It's a commonly used tool for students.

<https://kugpa.herokuapp.com/>

### laborodor

A small web app developed with pure React.js for my personal use. It's a tool for you to work on your daily tasks within a given time period inspired by the Pomodoro technique.
